Powerful new features that protect your business

AVG® AntiVirus Business Edition 2016 is working smarter for you. It keeps your critical business and customer data safe from the latest threats and viruses and keeps your employees safe online.

Business never slows down. Neither do we

Stop threats and keep your business moving. With AVG's award-winning security products, you'll protect your business from the latest viruses and threats.

Save time and focus on your business

AVG Business AntiVirus minimizes security distractions and so you and your employees can focus on driving your business forward.

Keep employees safe online with Network AntiVirus

Free your workforce to surf, search and download with confidence. Smart prevention technology checks every web page and alerts you if it detects anything suspicious.

Keep customer information safe from hackers

Maintain your integrity as a reliable business partner by ensuring all your customer data is kept private and all online transactions are conducted safely.

Secure and manage your computers from a single console

Manage your AVG Business AntiVirus software remotely on your business network and stay in control no matter where you are. Easily deploy and manage your network antivirus software on your PCs and laptops.

Free phone support

Breathe easy knowing that AVG experts are always a phone call away.

Smart, actionable alerts

Detects and alerts you to problems that you can address easily from the simple dashboard.

NEW IN AVG ANTIVIRUS BUSINESS EDITION 2016

Scan faster with our new Scanning Engine

The 2016 scanning engine implements our most advanced algorithms that shorten scanning times so customers can work more efficiently and effectively.

Secure deletion with File Shredder

New for 2016, File Shredder securely deletes data to help prevent unintended recovery.

Secure your most valuable files with Data Safe

Create an encrypted, password protected virtual disk on your system and add another layer of protection for your folders and files.

Protect against the newest Malware with Outbreak Detection

New for 2016, we use advanced artificial intelligence to proactively identify malware samples that haven't yet been catalogued by our AVG ThreatLabs team.

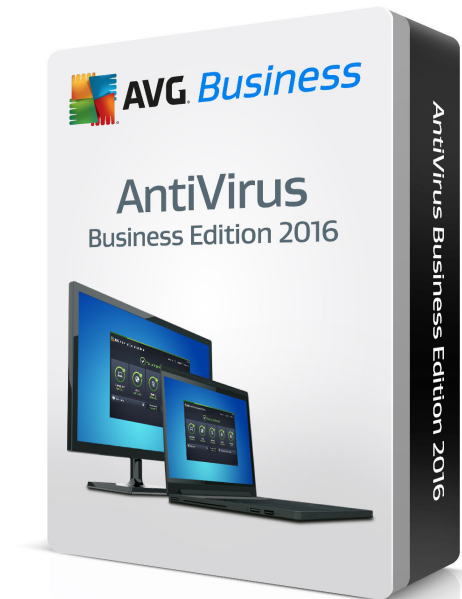

Protect from the quick click with Online Shield

Online Shield is improved with cloud-based detection to identify dangerous downloads faster than ever. Check files before you download them to help ensure they are safe and stay protected if you are exchanging files using MSN, Yahoo! and ICQ.
