

Release Notes: AVG Business Antivirus 20.5 (July 13, 2020)

Windows Antivirus: 20.5

Release Summary

This release contains new improvements and bug fixes to our AVG Business Antivirus client.

Improvements

- **Easier USB drive protection** - We'll now ask you to scan USB drives when you plug them into your computer. (You can turn this on in your notification settings for Unmanaged devices and in General Settings in Business Console). Disabled by default. In Business Console ver. 8.1
- **Improved taskbar icon** - There's no need to keep your antivirus open during scans. You can now see your scan progress from the Avast taskbar icon
- **Better botnet protection** - Web Shield is even better about stopping malware from connecting to malicious servers (You can turn this on in your Web Shield settings). Disabled by default. In Business Console ver. 8.1

Resolved issues

- **UI glitches for enabling/disabling shield in Protection section**
- **RescueDisk failures when being created on USB**
- **Corner cases when Firewall was consuming too much CPU in correlation with VPS requests**
