Release Notes: Avast Business Antivirus Client 18.8 (27th November 2018)

Console version: Cloud 6.5.40 / On-Premise 6.0.14
Agent version: 4.5.40.0

Release Summary

This release focuses on a small configuration change to support Windows XP and Windows Vista on Avast Business Antivirus version 18.8.

Information

Avast Business Antivirus client 18.8 will be the last version to support Windows XP and Windows Vista. We will continue to support these operating systems going forward and client version 18.8 will be installed.

When Avast Business Antivirus client version 19.x is released in the new year, this version will be available for installation to Windows 7 and higher operating systems, 18.8 will be available for installation to Windows Vista and Windows XP operating systems.

Windows Server 2008 R2 64-bit and higher operating systems will continue to be supported on client version 18.8 and 19.x.
