

Release Notes: AVG Business Antivirus 21.8 (late September, 2021)

Windows Antivirus: 21.8

Release Summary

This release contains new improvements and bug fixes to our AVG Business Antivirus client.

Improvements

- Improved exceptions — You can now add exceptions solely for Behavior Shield.
- Improved Password Protection — Your newly created password-backup files in your browser are now protected, too.
- Firewall tweaks — To better protect your data, we'll now prevent switching to a public profile when you're using the Remote Desktop Protocol.

Bug fixes for:

- Fixed cases where detection dialogs were not shown for detections when apps were full-screen.
- We've updated our UI renderer CEF to the latest version (ver. 4472) and plugged some security holes along the way.
- Fixed cases where licenses were not properly delivered with sole internet proxy.
- Fixed an issue where the restart dialog was not shown when Do Not Disturb Mode was active.
- Fixed an issue where clear utility did not start properly for systems that lacked SSE3 support.
- Fixed a tray-icon bug — You'll now see the proper status of shields in our system-tray icon after restarting your PC.
