Antivirus

Antivirus for Desktop (Mac and Windows)

Official Product Name

AVG AntiVirus for Mac, AVG Internet Security for Mac, AVG Antivirus Free, AVG Internet Security

AVG Internet Security Business Edition, AVG Antivirus Business Edition, AVG File Server Business Edition, AVG Email Server Business Edition, AVG Remote Administration

(collectively as "Antivirus for Desktop")

Core Functionality

The Antivirus for Desktop provides protection against malicious software by performing key tasks, such as pinpointing specific files for the detection of malwares, scheduling automatic scans, and securing your device against malware.

What are Product's Main Features

- **CommunityIQ** is a threat monitoring service for Windows and Mac which sends information about a threat detected in your device to our server, so we can observe how the threat spreads and block it. This is vital for the functioning of our Antivirus and our ability to keep your device secure.
- CyberCapture detects and analyses rare, suspicious files on your Windows. If you attempt to run such a file, CyberCapture locks the file from your PC and sends it to our Threat Lab where it is analysed in a safe, virtual environment. All files are uploaded over an encrypted connection, which means your data is inaccessible to hackers.
- **File Reputation** provides a real-time comparison with an up-to-date list of malware databases of executable files sourced from users of Windows who agree to participate in the service. FileRep processes files or their

- hashed versions to evaluate which are infectious and updating virus databases.
- Online Security is a browser plug-in which needs to be specifically activated which checks if the site isn't malicious or phishing.
- Browser Cleanup is a module inside Antivirus for Desktop (Windows)
 which inspects the browser extensions of most browsers, tries to identify
 malicious extensions and offers to remove them. Browser Cleanup is on
 by default.
- Web Shield scans data that is transferred when you browse the internet in real-time to prevent malware from being downloaded and run on your computer. By default, Web Shield is on and configured to provide optimal protection when switched on.
- File Shield scans programs and files saved on devices for malicious threats in real time before allowing them to be opened, run, modified, or saved.
- Email Shield scans for threats in your incoming and outgoing email messages and attachments. Scanning applies only to messages sent or received using mail management software, such as Microsoft Outlook, Apple Mail or Mozilla Thunderbird.
- Hack Alerts when enabled, it searches and monitors email addresses associated with your Account for data breaches to alert you when your data has been compromised in a breach and your information is exposed on the dark web. This is done in cooperation with our partner SpyCloud which checks your credentials against its repository of stolen accounts. For further information please refer to its privacy policy here.

While using Antivirus for Desktop, we collect and process the following Service and Device Data (in addition to Account Data and Billing Data, if relevant):

Service Data	What we use it for and for how long
Identifier of the content (message) being delivered	 Service Provision (36 months) To monitor service functionality In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem

	Product and Business Improvement (50 months) ■ To monitor messaging performance
IP address	Service Provision (36 months) • To detect the approximate location of malicious software. For free Antivirus, IP address is replaced at activation with city/country. For free and paid Antivirus, it is a part of malware infection file replaced in 30 days with city/country
Samples, files	Service Provision (36 months) • For protection, detection, analysis, blocking, quarantining and deleting of malicious software
Detections	Service Provision (36 months) • For protection, detection, blocking, quarantining and deleting of malicious software
URLs and referrers	Service Provision (36 months) • For protection, detection, blocking, quarantining and deleting of malicious software
Events and product usage	Service Provision (36 months) ■ To ensure continuous functionality (installations, versions, updates, settings) and map how users interact with our product In-product Messaging (24 months) ■ To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement

	 To better understand our users' behavior (50 months) To introduce a new feature or product based on previous experience (36 months)
 Email Shield - Detections email subject sender email address email content or attachment detection type and name 	Service Provision (1 month) • For protection, detection, blocking, quarantining and deleting of malicious software

Device Data	What we use it for and for how long
Internal online identifiers (GUID, Device ID)	 For ensuring continuous functionality and breaking down entries in database In-product Messaging (24 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand our users' behavior (50 months) To introduce a new feature or product based on previous experience (36 months)
Information concerning computer or device	 Service Provision (36 months) To check for compatibility issues in automated crash dumps In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand users' behavior (50 months)

	 To introduce a new feature or product based on previous experience (36 months)
Location	 Service Provision (36 months) To set up a proper product language version for Windows In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand users' behavior based on approximate location (50 months) To introduce a new feature or product based on approximate location (36 months)
Applications - other security SW / antiviruses present	 Service Provision (36 months) To determine how Antivirus should behave (e.g. if it should be activated in Windows Security Centre or not, whether it should run in passive or active mode)
Applications on the device	 For formulating rules of how Antivirus should behave in relation to other SW installed (e.g. exceptions in scanning, filtering, notifications, applying Do not Disturb rules) In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (up to 36 months) To improve the users' overall experience by developing new features and products To understand/estimate market opportunity

Our other products/licenses on the device and their status	 Service Provision (36 months) To recognize what features should be enabled or disabled, what product should be installed or uninstalled In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (up to 36 months) To improve the users' overall experience by developing new features and products To understand/estimate market opportunity
Internet and connection / Network data / Number of devices on Network	 For security prerequisites (e.g. DNS settings check, port restrictions enabling or disabling Security status check of devices on the network) In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (36 months) To introduce a new feature or product based on previous experience
Browsers (installed, default)	 For opening content in given browser In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand users' behavior (50 months)

Note that samples (files, URLs) used for malware analysis are kept in our systems as long as it is necessary to ensure proper functionality of the AV product. These samples are not connected with any identifiers or individuals and the retention periods indicated above do not apply to this use.

The third-party analytics tools we use for Antivirus for Desktop is <u>Google Analytics</u>. For further information regarding our third-party analytics partner, including its privacy policy, please refer to our <u>Privacy Policy</u>.

Antivirus for Mobile (Android)

Official Product Name

AVG AntiVirus Free for Android, AVG AntiVirus Pro for Android (collectively as "Antivirus for Mobile (Android)")

Core Functionality

Antivirus for Mobile (Android) provides people with essential mobile security with added privacy. Block malware, check the safety of installed apps, scan public Wi-Fi networks for possible security weaknesses — all with a single app.

What are Product's Main Features

- Device Scan scans your device or a specific file for malware apps and files and various types of security vulnerabilities.
- Wi-Fi Security and Speed Check enables you to scan your network for vulnerabilities, and tests the speed of the network.
- Web Shield detects and notifies you when accessing a malicious website that could represent a potential security risk for you.
- **App Locking** is a paid feature, which protects your sensitive apps with a PIN, pattern, or fingerprint.
- **App Insights** allows you to view which permissions are required by each of your installed apps.
- Clean Junk analyzes the space on your device and displays the amount of storage space that is being used by junk files.
- Photo Vault allows you to protect access to your photos with a PIN code.

- Hack Alerts when enabled, it searches and monitors email addresses associated with your Account for data breaches to alert you when your data has been compromised in a breach and your information is exposed on the dark web. This is done in cooperation with our partner SpyCloud which checks your credentials against its repository of stolen accounts. For further information please refer to its privacy policy here.
- Privacy Audit provides the user with an evaluation of installed apps based on data collected and permissions asked by the app compared to similar apps. The feature also compares its findings with the app's privacy policy declarations.
- VPN feature protects your privacy by encrypting your online communication so no one can spy on what you're doing online. It allows you to pick a specific location to be connected from. Our <u>VPN Policy</u> sets out the basis on which any data we collect from you, or that you provide to us, will be processed by us.
- **Scam Protection** warns you if you tap a dangerous link from any email, SMS, or messaging app.

While using Antivirus for Mobile (Android), we collect and process the following Service and Device Data (in addition to Account Data and Billing Data, if relevant):

Service Data	What we use it for and for how long
Identifier of the content (message) being delivered	 Service Provision (36 months) To monitor service functionality In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (50 months) To monitor messaging performance
IP address	Service Provision (36 months) ● To detect the approximate location of malicious software. For free Antivirus, IP address is replaced at activation with

	city/country. For free and paid Antivirus, it is a part of malware infection file replaced in 30 days with city/country
Samples, files	Service Provision (36 months) • For the functionality of malware scanning and analysis
Detections	Service Provision (36 months) • For the functionality of malware scanning
Information concerning URLs of websites visited (malicious and non-malicious) and referrers (previous page with link to malware-hosting site)	Service Provision (36 months) • For Web Shield feature's detection of malicious websites
Events and product usage	 To ensure continuous functionality (installations, versions, updates, settings) and map how users interact with our product In-product Messaging (24 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Contextual promotional messaging Product and Business Improvement To better understand our users' behavior and users' acquisition (50 months) To improve the user's overall experience by developing new features and products (36 months)
User's email address associated with your Account	Service Provision (36 months) • To search for your credentials in data breaches.

	 To send a requested report to you on whether or not their credentials have leaked. Product and Business Improvement (36 months) To improve the user's overall experience
User's email for Hack Alerts	 Service Provision (36 months) To send a requested report to you on whether or not their credentials have leaked Product and Business Improvement (36 months) To improve the user's overall experience
Events and product usage (app metadata, number of hack alerts checks, number and result of Wi-Fi scans, error logs and screen flow)	Service Provision (36 months) • To ensure continuous functionality (installations, versions, updates, settings) Product and Business Improvement • To understand the user's behavior (14 months) To improve the user's overall experience (36 months)

Device Data	What we use it for and for how long
Online identifiers (GUID, Device ID (Android ID), Advertising ID)	Service Provision (36 months) ■ To ensure functionalities of the product and its features In-product Messaging (24 months) ■ To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement

	 To recognize reinstalls of the app on the same device (36 months) Third-party Ads (not stored after provision) We process Advertising ID only for IronSource which allows it to place advertisements
computer or device (carrier, OS version, OS build number, Hardware ID, device model, device brand, device manufacturer, device API level)	 Service Provision (36 months) To ensure functionalities of the product and its features In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand users' behavior (50 months) To improve the user's overall experience by developing new features and products (36 months)
longitude and latitude)	 Delivering geo-specific changes to app's configuration (both local or remote) In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand users' behavior based on approximate location (50 months) To introduce a new feature or product based on approximate location (36 months)

Applications	Service Provision (36 months) To define rules for malware protection how Antivirus should behave In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem
Internet and connection	 Service Provision (36 months) For security prerequisites In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand users' behavior (50 months) To introduce a new feature or product based on previous experience (36 months)

These are the third-party analytics tools we use for Antivirus for Mobile (Android):

- Google Analytics
- Google Firebase and Crashlytics Analytics for Android
- AppsFlyer
- Singular

For further information regarding our third-party analytics partners, including their privacy policies, please refer to our <u>Privacy Policy</u>.

The free version of Antivirus for Mobile (Android) serves relevant third-party advertisements. These are the advertising partners we use for this product:

- Google AdMob
- Amazon
- Facebook Audience Network
- InMobi
- AppLovin

- Unity Technologies
- IronSource
- Liftoff Mobile

For further information regarding our third-party ads partners, including their privacy policies, please refer to our Consent Policy.

Antivirus for Mobile (iOS)

Official Product Name

AVG Mobile Security

Core Functionality

AVG Mobile Security provides protection for your browsing, passwords, photos and Wi-Fi. The product consists of several free and paid features, such as Hack Alerts and VPN, which are described in detail below.

What are Product's Features

- **Web Shield** detects and notifies you when accessing a malicious website that could represent a potential security risk for you.
- Hack Alerts looks for leaked personal information, whether your data has been compromised in a breach and your information is exposed on the dark web. If we identify new breaches we alert you based on the email address you submitted. This is done in cooperation with our partner SpyCloud which checks your credentials against its repository of stolen accounts. For further information please refer to its privacy policy here.
- **Photo Vault** locks your photos in an encrypted vault and secure them with a PIN, Touch ID, or Face ID so that only you have access to them.
- VPN feature protects your privacy by encrypting your online communication so no one can spy on what you're doing online. It allows you to pick a specific location to be connected from. Our <u>VPN Policy</u> (together with any other documents referred to in it) sets out the basis on which any data we collect from you, or that you provide to us, will be processed by us.

Personal Data We Process

While using Mobile Security (iOS), we collect and process the following Service and Device Data (in addition to Account Data and Billing Data, if relevant):

Service Data	What we use it for and for how long
Information concerning URLs of websites visited (malicious and non-malicious) and referrers (previous page with link to malware-hosting site)	Service Provision (36 months) ● For Web Shield feature's detection of malicious websites
Timestamps of your connections for VPN	Service Provision (36 months) ■ To manage the number of concurrent active connections, and handle abuse Product and Business Improvement (36 months) ■ To improve the user's overall experience
The subnet of your originating IP address for VPN	Service Provision (36 months) • To plan for increased network demand and capacity
IP address of the VPN server you're using for VPN	Service Provision (36 months) ■ To troubleshoot our service and plan for new network capacity
Amount of data transmitted for VPN	Service Provision (36 months) • To plan for new network capacity and server improvements
E.G. 5GB up or down	Product and Business Improvement (36 months) ■ To improve the user's overall experience
User's email for Hack alerts	 Service Provision (36 months) To send a requested report to you on whether or not their credentials have leaked Product and Business Improvement (36 months) To improve the user's overall experience

AntiTrack

Official Product Name

<u>AVG AntiTrack for Windows</u>, <u>AVG AntiTrack for Mac</u>, (collectively as "AntiTrack")

Core Functionality

As you browse the web, cookies and digital fingerprint-based tracking technologies collect and link information about your activities in order to create profiles of your behavior. This data is then shared, bought and sold by analytics and ad-tech firms. AntiTrack removes cookies and masks the device's "fingerprint" to prevent third- parties from identifying you and following your behavior across the web.

What are the Product's Features

- AntiFingerprinting stops scripts from fingerprinting the user's device and tracking their browsing behavior across the web. In particular, this feature relies on processing of browser version, hardware data, OS version, OS locale and AntiTrack version.
- Privacy Score provides the user with an evaluation of how private they
 are based on various in-app configurations. In particular, this feature
 relies on processing of browser version, hardware data, OS version, OS
 locale, AntiTrack version, In-app settings (such as features that are
 turned on/off).
- **Fingerprint Randomizer** will automatically change the user's digital 'Fingerprint' in regular intervals, or allow the user to manually change said 'Fingerprint'. In particular, this feature relies on processing of browser version, hardware data, OS version, OS locale and AntiTrack version.
- **Browser cleanup** helps the user manage browsing history and cookies by allowing the user to manually clear this information or schedule an automatic deletion at a specific time. In particular, this feature relies on processing of browser version, hardware data, Cookies, OS version, OS locale, AntiTrack version, In-app settings (such as features that are turned on or off).
- Browser protection helps users stay protected from online tracking attempts and similar threats through supported browsers. Any time a suspicious script (tracking attempt) encounters the user's 'Fingerprint', the user is notified. In particular, this feature relies on processing of browser version, hardware data, OS version, OS locale, website scripts and tracking elements, and AntiTrack version.
- Allowed Websites and whitelisting processes allows the user to add their favorite websites into the Allowed Websites list so that their stored browser data is not be cleared during the automatic and manual cookie clearing process. Additionally, no anti-tracking measures will be active on these websites once they are added to the Allowed Websites list. In particular, this feature relies on processing of whitelisted websites, browser version, hardware data, OS version, OS locale and AntiTrack version.
- System Privacy helps stop third parties from seeing, tracking, and collecting customer information from the supported operating system. Specifically, this is related to the customer's computer login security, protecting files and data on that machine, and keeping the customer's computer activities private. This provides another layer of security by

giving the customer the ability to configure their Privacy Settings within AntiTrack. In particular this feature relies on processing of browser version, hardware data, OS version, OS locale, information about operation system's keys and tasks associated with privacy risks, and AntiTrack version.

Personal Data We Process

We process only the following Service and Device Data (in addition to Billing Data for paid version or Account Data if necessary):

Service Data	What we use it for and for how long
Usage Frequency (e.g., the amount of time the application is in use)	 Service Provision (the earlier lifetime of the account and 24 months) To provide feature enhancement, customer support and product maintenance
Number of Application Launches	 Service Provision (the earlier lifetime of the account and 24 months) To provide product maintenance and customer support
License Key	Service Provision (the earlier lifetime of the account and 24 months) • To regulate access to the product, provide customer support, and administer product updates
	 Service Provision (the earlier lifetime of the account and 24 months) To show Browser Protection and Cookie Cleanup status in the product, and identify the default browser for opening the links from the app. To check the browser extension status (only in supported browsers). When Browser Protection feature from the product is ON, for AntiTrack to obfuscate the following properties of the browser under Anti-Fingerprinting:

	User-AgentPluginsHTTP Headers
Cookies	 Service Provision (the earlier lifetime of the account and 24 months) To identify the "Total (number of) Cookies, and Tracking Cookies" available for a browser To perform the cookie cleanup (delete the cookies, cache, and browser history).
Whitelisted websites	Service Provision (the earlier lifetime of the account and 24 months) • To add websites into the Allowed Websites list
Website Tracker Details (Javascript, HTML documents)	Service Provision (the earlier lifetime of the account and 24 months) • To identify website trackers on the website that the user is visiting and determine if the Javascript/Html is a tracker or not. In-product messaging (6 months) • To update the user about tracking.
AntiTrack version	Service Provision (the earlier lifetime of the account and 24 months) • To provide user support, troubleshoot In-product Messaging (6 months) • To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (24 months) • To better understand how users' interact with certain aspects

Install Date or Time	Service Provision (the earlier lifetime of the account and 24 months) To do license management In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (24 months) To know when to market new features and or products
Crash Incidents	Service Provision (the earlier lifetime of the account and 24 months) • To ensure continuous functionality

Device Data	What we use it for and for how long
,	 Service Provision (the earlier lifetime of the account and 24 months) To provide user support, troubleshoot Product and Business Improvement When developing new features - to adjust the scope of the feature based upon the requirements and the functionality of certain operating systems (24 months) To better understand how users' interact with certain aspects 24 months)
OS Locale	 Service Provision (the earlier lifetime of the account and 24 months) To segment updates by location In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (24 months) To determine which segments of our users to roll out a new feature or product

To better understand how users' interact with certain aspects
Service Provision (the earlier lifetime of the account and 24 months) ■ To install the product, provide application updates, customer support Product and Business Improvement (24 months) ■ To better understand how users' interact with certain aspects

The third party analytics tool we use for the AntiTrack Mac platform is <u>App</u> <u>Center</u>. For further information regarding our third party analytics partner, including its privacy policy, please refer to our <u>Privacy Policy</u>.

Alarm Clock

Official Product Name

Alarm Clock Xtreme

Core Functionality

Alarm Clock provides an alarm clock for Android devices, using built in system features users can schedule alarms and customize their behavior in many ways.

What are Product's Features

- Alarm Clock schedules a one time alarm or repeated alarms, customize sound and other behavior while alarms go off and set many other parameters. This feature does not require any special permission, except when a user wants to use a local sound file for their alarms, the app asks to access device storage.
- **Timer** schedules timers that would go off after desired time is passed. On the technical level timers are just different method of scheduling alarms
- **Reminders** are a different method of scheduling alarms tailored towards use cases when one needs to remind themselves about something.

- Unlike regular alarms, reminders can be set with a specific date in the future and the way they go off is more subtle than alarms that are designed to wake users up.
- **Stopwatch** can measure elapsed time. Stopwatch does not need any special permission to function.
- My Day is a feature that can be optionally brought to the foreground after an alarm is dismissed. My Day is designed to provide useful information to users in the morning. My Day shows weather forecasts and it can be optionally more precise if the user provides permission to determine location from device. My Day also optionally provides information about upcoming events if users agree to access their device calendar.

While using Alarm Clock, we collect and process the following Service and Device Data (in addition to Billing Data for paid version):

Service Data	What we use it for and for how long
Identifier of the content (message) being delivered	Service Provision (36 months)
IP address	Service Provision (36 months) ■ Replaced with city/country for delivering geo-specific changes to app's configuration (both local or remote) In-product Messaging (6 months) ■ To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (14 months) ■ To monitor messaging performance

Events and product usage	Service Provision (36 months) • To ensure continuous functionality (installations, versions, updates, settings) and map how users interact with our product
	 In-product Messaging (24 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand our users' behavior and users' acquisition (14 months) To consider roadmap for type of features and products we want to develop in future (36 months)

Device Data	What we use it for and for how long
Device ID (Android ID),	Service Provision (up to 36 months) To identify correct installation In-product Messaging (24 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand our users' behavior (14 months) To recognize reinstalls of the app on the same device (36 months) Third-party Ads (not stored after provision) We process Advertising ID which allows ad placement

	Service Provision (36 months)
computer or device (carrier, OS	
version, OS build number,	and its features. For example to inform
hardware ID, device model,	users about settings that make alarm
device brand, device	scheduling more reliable on specific
manufacturer, device API level)	devices.
,	In-product Messaging (6 months)
	 To inform users of problems that will not
	be solved by the currently installed
	product and to offer users a solution to
	the detected problem
	Product and Business Improvement
	To better understand our users' behavior
	(14 months)
	 To determine whether a new feature or
	product should be developed for subset
	of users (36 months)
Location (city/country longitude	Service Provision (36 months)
and latitude)	 Delivering geo-specific changes to app's
and latitude)	configuration (both local or remote)
	 Related to My Day feature which can
	show weather forecasts
	In-product Messaging (6 months)
	 To inform users of problems that will not
	be solved by the currently installed
	<u> </u>
	product and to offer users a solution to
	the detected problem
	Product and Business Improvement ■ To better understand users' behavior
	based on approximate location (14
	months)
	To introduce a new feature or product based an approximate leasting (26)
	based on approximate location (36
	months)

Calendar Events	Service provision (36 months)
	 To provide an overview of upcoming
	events on My Day Screen. Specific
	content of users calendar is only
	processed locally on user device and
	never stored anywhere.
	In-product Messaging (6 months)
	 To inform users of problems that will not
	be solved by the currently installed
	product and to offer users a solution to
	the detected problem
	Product and Business Improvement (14
	months)
	To better understand users' behavior
Internet and connection	Service provision (36 months)
	 For functionality of our features, providing
	error messaging
	In-product Messaging (6 months)
	To inform users of problems that will not be applied by the currently installed.
	be solved by the currently installed
	product and to offer users a solution to the detected problem
	Product and Business Improvement
	 To better understand users' behavior (14
	months)
	 To introduce a new feature or product
	based on previous experience (36 months)

These are the third-party analytics tools we use for Cleaner for Android:

- Google Firebase Analytics and Crashlytics for Android
- AppsFlyer

For further information regarding our third-party analytics partners, including their privacy policies, please refer to our <u>Privacy Policy</u>.

The ad-supported version of Alarm Clock serves relevant third-party advertisements. These are the advertising partners we use for this product:

- Google AdMob
- Facebook Audience Network
- InMobi

For further information regarding our third-party ads partners, including their privacy policies, please refer to our Consent Policy.

Battery Saver

Official Product Name

AVG Battery Saver for Windows

Core Functionality

Battery Saver is a tool designed to extend the battery life of your PC by reducing internal and external power demands.

What are Product's Features

• Battery Saver (profiles) creates a power plan profile to apply the predefined set of various settings which shall reduce the amount of power consumed by the PC.

Personal Data We Process

While using Battery Saver, we collect and process the following Service and Device Data (in addition to Billing Data or Account Data if relevant):

Service Data	What we use it for and for how long
	Service Provision (up to 12 months)
	 To monitor service functionality
	In-product Messaging (12 months)
Events and product usage	 To inform users of problems that
	will not be solved by the
	currently installed product and to
	offer users a solution to the
	detected problem
	Product and Business
	Improvement
	 To better understand our users'
	behavior (12 months)

 To improve users' overall
experience by developing new
features or products (up to 12
months)

Device Data	What we use it for and for how long
Internal online identifiers (GUID, MIDEX, UUID)	Service Provision (up to 12 months) • To monitor service functionality In-product Messaging (12 months) • To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem
Information concerning device (platform, computer type, vendor, model, brightness, wifi_status, bluetooth_status, battery, capacity, state, lifetime, critical bias, cycle count, voltage, granularity, manufacturer date)	 To check for compatibility issues in automated crash dumps In-product Messaging (12 months) To inform users of problems that
Location (country, region, city, latitude, longitude, internet service provider, internet autonomous system)	Service Provision (up to 12 months) • To set up a proper product

	 To better understand users' behavior based on approximate location To introduce a new feature or product based on approximate location
Other Avast products/licenses on the device and their status	 Service Provision (12 months) To recognize what features should be enabled or disabled, what product should be installed or uninstalled In-product Messaging (12 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem

The third-party analytics tool we use for Battery Saver is <u>Google Analytics</u>. For further information regarding our third-party analytics partner, including its privacy policy, please refer to our <u>Privacy Policy</u>.

BreachGuard

Official Product Name

BreachGuard

Core Functionality

Our goal is to enable people to take back their privacy online. Remediate past breaches and minimise the risk of abuse of their data in the future. We aim to provide convenient solutions for everyday life online without sacrificing privacy.

- 1. Enabling users to discover and fix online privacy threats.
- 2. Prevent data collection by advertising companies and data brokers, depending on region.
- 3. Educating users about privacy and security online.

What are Product's Features

- Risk Monitor is 24/7 dark web monitoring for leaked personal information. BreachGuard leverages the most comprehensive database of the dark web it detects whether users have been compromised in a breach and their information is exposed on the dark web. If we identify new breaches we alert you based on the email address you submitted. This is done in cooperation with our partner SpyCloud which checks your credentials against its repository of stolen accounts. For further information please refer to its privacy policy here. The feature also has the capability, if you consent, to scan your browser for weak, reused or breached passwords and provides instructions to fix these passwords.
- Personal info remover submits opt-out requests to data brokers in North America. This feature processes names (first name, middle name, last name), address (street, city, country, state, zip code), phone number, email and Date of Birth (DOB). The reason for this is that data broker opt-out forms require some of, if not all of the information to submit a valid opt-out request and verify that you are in fact in their database. As a result, we collect this basic information from you to submit the opt-out requests on your behalf.
- Privacy Advisor provides updates and guidance related to online privacy, including but not limited to: recent data breaches and guides to optimize your privacy for social media sites and other common services. If you opt-in, this functionality will process your bookmarks and browsing history to improve the quality of content so we can distinguish guides which are relevant to you (we are not processing full urls but we need only the domain name).
- Identity Assist we have partnered with a third party, Generali Global Assistance, to provide Identity Assist in BreachGuard. The service consists of two sub-features, ScamAssist and Identity Resolution. ScamAssist specialists act as trusted advisors to customers by helping them identify which of the solicitations they have received are potentially fraudulent. Resolution Specialists are available 24/7/365 to educate customers about how identity theft and cyber crimes occur, as well as provide tips and tools to help keep their identity and digital privacy secure. Note we do not process any personal data from your interaction with Generali, Generali does, see its privacy policy here.

By default, BreachGuard processes locally on your system the following data:

- Names (first name, middle name, last name), address (street, city, country, state, zip code), phone number, email and date of birth – to send data opt-out requests on your behalf via Personal Info Remover.
- Browser credentials (website, username, password) to scan your browser for weak, reused or breached passwords and provide instructions how to fix
- Browsing information (URL) and bookmarks to highlight relevant privacy guides.

This data is not sent to our environment.

While using BreachGuard service, we collect and process data in our environment about you and your device in the following situations:

Service Data	What we use it for and for how long
	•
installs, Number of Application	To improve user experience and

Device Data	What we use it for and for how long
OS Version, BreachGuard Application Version, Activation Key E.g. Windows 10, BreachGuard v1.2.0	Service Provision (24 months) ● For users' support and troubleshooting In-product Messaging (24 months) ● To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (39 months) ● For development of new features or products

	 To understand the users' behavior and product development planning
OS Locale	Service Provision (24 months)
e.g. Device Model (e.g. Windows 10 (13-inch 2017), RAM (Random Access Memory), GPU (Graphical Processing Unit), and Central Processing Unit (CPU)	Service Provision (24 months)

Cleaner

Official Product Name

AVG Cleaner for Android ("Cleaner for Android")

Core Functionality

Cleaner for Android detects and removes unnecessary files to free up storage space. Equally, it can stop running processes to optimize device performance.

What are Product's Features

• **App Overview** allows to browse installed and pre-installed applications, provides functionality to uninstall or stop. In particular, this feature relies on processing device provided stats about other apps. These stats are processed locally (on device) in order to provide the service.

- Media Overview provides an overview of files broken down by type (eg images, audio files, video). This feature does not need any specific data processing outside of operations made locally (on device).
- Automatic Profiles allows you to select conditions where desired actions (system settings changes) should be applied by this product. For example one can automatically decrease screen brightness when at home. Location based condition require permission to get location data, however these data are never transmitted from the device and all are processed locally.
- Cloud Transfers allows you to backup their files to an external cloud storage. We are using Google Drive and Dropbox APIs to do so, e.g. you can login using their Google or Dropbox credentials to establish such connections. Note credentials are not visible to us.

While using Cleaner for Android, we collect and process the following Service and Device Data (in addition to Billing Data for paid version):

Service Data	What we use it for and for how long
Identifier of the content (message) being delivered	 Service Provision (36 months) To monitor service functionality In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (14 months) To monitor messaging performance
IP address	 Service Provision (36 months) Replaced with city/country for delivering geospecific changes to app's configuration (both local or remote) In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement

	To monitor messaging performance (14 months)
Events and product usage	 To ensure continuous functionality (installations, versions, updates, settings) and map how users interact with our product In-product Messaging (24 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand our users' behavior and users' acquisition (14 months) To consider roadmap for type of features and products we want to develop in future (36 months)

Device Data	What we use it for and for how long
	 Service Provision (36 months) For counting users, ensuring functionality and stability In-product Messaging (24 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand our users' behavior (14 months) To recognize reinstalls of the app on the same device (39 months) Third-party Ads (not stored after provision) We process Advertising ID only for IronSource which allows it to place advertisements
computer or device (carrier, OS version, OS	 Service Provision (36 months) To ensure functionalities of the product and its features In-product Messaging (6 months)

ID, device model, device brand, device manufacturer, device API level)	solved by the currently installed product and
Location (city/country, longitude and latitude)	 Delivering geo-specific changes to app's configuration (both local or remote) Related to Battery Profile feature, as users can set being in a certain location as a trigger to automatically launch a Battery saving profile. In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand users' behavior based on approximate location (14 months) To introduce a new feature or product based on approximate location (36 months)
Applications	 To provide insights, such as usage stats to help identify unused apps (storage cleaning opportunity), drain impact (battery, data) to help identify apps that have significant effect on device resources, or notification stats to help identify "noisy" apps which can be "muted" by links to system settings In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem

	Product and Business Improvement (14 months) ■ To better understand users' behavior
Internet and connection	 Service provision (36 months) For functionality of our features, providing error messaging In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand users' behavior (14 months) To introduce a new feature or product based on previous experience (36 months)

These are the third-party analytics tools we use for Cleaner for Android:

- Google Firebase Analytics and Crashlytics for Android
- AppsFlyer

For further information regarding our third-party analytics partners, including their privacy policies, please refer to our <u>Privacy Policy</u>.

The free version of Cleaner for Android serves relevant third-party advertisements. These are the advertising partners we use for this product:

- Google AdMob
- Amazon
- Facebook Audience Network
- InMobil
- AppLovin
- Unity Technologies
- IronSource

For further information regarding our third-party ads partners, including their privacy policies, please refer to our Consent Policy.

Driver Updater

Official Product Name

AVG Driver Updater

Core Functionality

Driver Updater provides scan and potential update or fix of outdated drivers on a users' PC to optimize it for better performance and avoid potential crashes or malfunctions.

Personal Data We Process

While using our Driver Updater services, we collect and process data about you in the following situations:

Service Data	What we use it for and for how long
Identifier of the content (message) being delivered	Service Provision (12 months)
Events and product usage	Service Provision (12 months) ■ To ensure continuous functionality (installations, versions, updates, settings) and map how users interact with our product In-product Messaging (12 months) ■ To inform users of problems that will not be solved by the currently installed

Device Data	What we use it for and for how long
Online identifiers (GUID, MIDEX, UUID, Device ID)	 Service Provision (12 months) For ensuring continuous functionality and breaking down entries in database In-product Messaging (12 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (12 months) To better understand our users' behavior To introduce a new feature or product based on previous experience
Information concerning device (type, vendor, model, manufacturer, version)	,

(driver version, updated date,	Service Provision (12 months)
Location (country, region, city, latitude, longitude, internet service provider, internet autonomous system)	version for Windows
Other Avast products/licenses on the device and their status	 Service Provision (12 months) To recognize what features should be enabled or disabled, what product should be installed or uninstalled In-product Messaging (12 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem

The third-party analytics tools we use for Driver Updater for Desktop is <u>Google Analytics</u>. For further information regarding our third-party analytics partner, including its privacy policy, please refer to our <u>Privacy Policy</u>.

Management Console

Official Product Name

AVG Cloud Management Console

Core Functionality

The management console makes it easy to deploy various protection services to multiple devices, manage all devices from one place, mix and match device types, schedule regular scans, and quickly add more devices.

Please note that through this Cloud Management Console certain settings related to privacy are managed by and information from managed devices is accessible to the administrator of the console or the Managed Service Provider you chose. You, as a user, are informed about the role of the administrator during the installation. Businesses are responsible for informing you about this fact and instructing administrators about best practices to ensure users' privacy.

- Monitor Device Security uses the console to monitor the health of all managed devices from one place, reviews the number of blocked threats, schedules regular scans, and more.
- **Dashboard** lets you view all alerts at a glance, address issues, and get the insight you need to make informed security decisions and stop threats that might be spreading among managed devices.
- Master Agent selects a device as the Local Update Server where all updates can be downloaded and saves bandwidth by scheduling and distributing updates to all endpoints in your network when it's convenient.
- **Policies** sets up security policies for all managed endpoints, such as antivirus scans, firewall, updates, and shutdowns to ensure optimal security for the entire network.
- **Updates** remotely downloads and distributes virus and program updates to all devices from one console to save time and bandwidth.
- **Notifications** send instant email notifications on security threats or network issues that need your attention, including outdated antivirus applications, extended device inactivity, and additional device update.
- **Reporting** provides detailed reports that include blocked threats, task lists, and protected devices, making it simple to improve security and customize protection.

- Subscriptions lists all valid subscriptions, licenses, and upgrade/downgrade options
- **Network Discovery** scans your network for connected devices to bring visibility over what devices should be taken care of.
- Cloud Backup securely stores selected data in the cloud as backup in case of data loss or disaster resulting in data loss/damage.
- Remote Control enables IT admins to quickly and securely connect to a user's device, access files and applications, and help troubleshoot issues in real time.
- Patch Management scans for missing operating system updates and third-party application patches and enables remote installation of those patches to resolve application vulnerabilities of endpoints.

We process only the following Data (in addition to Account Data and Billing Data if you purchased paid services or products from us):

Device Data	What we use it for
Internal online identifiers (Device ID)	 Service Provision For ensuring continuous functionality and breaking down entries in database Product and Business Improvement To better understand our users' behavior To introduce a new feature or product based on previous experience
Device name, brand, type, removable device name and serial number (for USB Protection)	- To better identify and manage devices
Information concerning computer or device (OS build, display)	 Service Provision To check for compatibility issues in automated crash and agent log dumps Product and Business Improvement To better understand users' behavior To introduce a new feature or product based on previous experience

Applications	Service Provision ■ To determine which application needs to be updated, to provide support and troubleshooting
Files, content	Service Provision • To provide cloud backup, email archive
Internet and connection / Network data / Number of devices on Network	
Location, IP and MAC addresses	 Service Provision For admins to have a possibility to localize their devices
Device status (last connection to Avast)	Service Provision • For admins to see which devices were active and when and determine the risk profile
Location	 Service Provision To set up a proper product language version In-product Messaging To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand users' behavior based on approximate location To introduce a new feature or product based on approximate location

Language, time zon0065		
	 To set the right language settings 	
	In-product Messaging	
	 To send campaigns localized based on 	
	users' language	

Service Data	What we use it for
Identifier of the content (message) being delivered	
Detections	Service Provision • For administrators to review and analyze what threats were detected in the network, files or emails
URLs	 Service Provision For protection, detection and blocking of malicious or restricted content
Our other products/licenses on the device and their status	Service Provision • For administrators to have an overview of running services and expiration dates
Events and product usage	 To provide reporting capability for admins and to ensure continuous functionality (installations, versions, updates, settings) and map how users interact with our product In-product Messaging To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand our users' behavior

	To introduce a new feature or product based on previous experience
Audit Logs	Service Provision ■ To provide record of changes in application and endpoints

Admin and User Data	What we use it for
Name, surname, email address	Service provision ■ To provide access and services, possibility to send reports or notifications about security events or product updates
User access rights	Service provision • To provide access to the product

Company Data	What we use it for
Name, business, finance and tax details and contact information	
Business type	 Service Provision To offer the right solution based on the type of the company

We will process the data described above only as long as necessary for the purposes we described. We delete the data we collected within 60 days after the termination of the service.

We cooperate with the following third parties when providing our services:

- The Cloud Backup service is provided in cooperation with Infrascale Inc. See their Privacy Policy.
- The Remote Control service is provided in cooperation with XLAB d.o.o. See their Privacy Policy.

The third-party analytics tool we use for Business Management Console is <u>Google Analytics, Hotjar, Medallia</u>. For further information regarding our third-party analytics partner, including its privacy policy, please refer to our <u>Privacy Policy</u>.

Online Security & Privacy

Official Product Name

Online Security & Privacy

Core Functionality

Online Security & Privacy is a browser extension (or plug-in) available for Chrome, Firefox, Edge and Safari. Whenever you visit a website we check if the site isn't malicious or phishing. We are able to provide you with this functionality by processing URLs.

- Antivirus checks the links in search results so the user knows if the page is trying to spread malware.
- Anti-phishing identifies and blocks phishing sites trying to steal your data.
- Anti-tracking blocks annoying tracking cookies that collect data on your browsing activities.
- Marking Search Results shows if the site is safe or not even before the user visits it.

- Advertising Data Collection opts out from ads based on user personal interests. By opting out of interest-based advertising it means the company or companies from which you opt out will no longer show ads that have been tailored to your interests.
- **Privacy Advisor** allows optimizing privacy settings on the most popular online platforms via step-by-step guidance.
- Global Privacy Control is a <u>3rd party solution</u> we have implemented in the settings, the user can send web companies he visits a 'GPC' signal that he wants to opt out of website selling or sharing his personal information

While using Online Security & Privacy, we process the following Service and Device Data:

Service Data	What we use it for and for how long
URL	Service Provision (24 months) ■ To check if URLs and the preceding referral domains or URLs (as applicable) are malicious or not to identify its source for threat analysis
Usage data (open extension, rated site, disabled trackers, change settings, site blocked)	updates, settings), map how users interact with

Device Data	What we use it for and for how long
identifier (GUID)	Service Provision (24 months) ■ To distinguish unique malware hits and evaluate it in our systems Product and Business Improvement (24 months)

	 To measure product telemetry and calculate statistics
Information on computer or device (browser, OS)	Product and Business Improvement (24 months) ■ To obtain usage statistics
Extension information (installation source and time, version and campaign ID)	,
Location / Country	 Service Provision (24 months) To detect country specific malware campaigns Product and Business Improvement (24 months) To measure product telemetry and calculate statistics
Language	 Service Provision (24 months) To make sure we communicate in right language Product and Business Improvement (24 months) To measure product telemetry and calculate statistics
Antivirus Status	Service Provision (24 months) ■ To being able to turn on Bank Mode which works only when Antivirus is installed and offers to user to open page in a safe sandbox environment on sensitive sites (banking)

Online Security & Privacy does not process Account or Billing Data.

The third-party analytics tools we use for Online Security & Privacy is <u>Google Analytics</u>. For further information regarding our third-party analytics partner, including its privacy policy, please refer to our <u>Privacy Policy</u>.

Official Product Name

AVG SafePrice

Core Functionality

SafePrice is a browser extension available for Chrome, Firefox, Edge and Safari. Whenever you visit an online shop or product site, SafePrice will show relevant price comparison and discount coupons.

What are Product's Features

- Discount coupons and other promotional offers are typically provided by store owners to incentivize purchases. This means that these coupons are relevant to specific domains, and sometimes specific pages only. In order to be able to offer relevant coupons, we need to check the current page URL against a list of available offers.
- Price Comparison looks for specific portions of the HTML code which allows it to identify basic information about the product you are shopping for – product name, SKU and current price. We then compare this information with a database of prices provided by our partners, and offer cheaper prices for the same product where available.

Information about available offers, coupons or cheaper prices is obtained from Ciuvo. We request this content based on the information obtained from the page, your language settings, country level location and search query within SafePrice. Once you click on the offer, your request will be processed by Ciuvo according to its <u>privacy policy</u>.

Personal Data We Process

While using SafePrice, we process the following Service and Device Data:

Service Data	What we use it for and for how long
URL and referrers	 Service Provision (36 months) To display discount coupons and price comparison offers relevant to the website that you are visiting
Search query	Service Provision (36 months) • If submitted by you, to search for relevant products and discount coupons
Product name and price	Service Provision (36 months)

	 To display price comparison offers relevant to the product that you are shopping for
User's feedback (ratings, comments)	 Service Provision (36 months) To tell whether the offers you received are relevant and up-to-date, and collect product feedback Product and Business Improvement (36 months) To develop new products based on the user's feedback

Device Data	What we use it for and for how long
Internal extension identifier (GUID)	 Service Provision (36 months) For ensuring continuous functionality and breaking down entries in database Product and Business Improvement (36 months) To measure product telemetry and calculate statistics
Information on computer or device (browser)	Product and Business Improvement (36 months)To obtain usage statistics
Extension information (installation source and time, version and campaign ID)	
Country	 Service Provision (36 months) To make sure our offers are relevant, and collect statistics on SafePrice usage by country
Language	Service Provision (36 months) ■ To make sure our offers are relevant, and collect statistics on SafePrice usage by language

SafePrice does not process Account or Billing Data.

Official Product Name

AVG Secure Browser ("Secure Browser for Desktop")

Core Functionality

Secure Browser for Desktop is a product currently offered for PC Windows and for macOS users.

- Browser Security & Privacy Center is built in Security & Privacy Center which is a curated collection of some key security and privacy features, tools and settings, organized into one management console making it easier for you to control and manage your online privacy and security.
- WebShield protects you from accessing dangerous websites, such as fake sites, sites that have harmful programs such as adware, spyware, ransomware, viruses, all types of other malware that aim at stealing your information. It includes https scanning that decrypts and scans encrypted traffic of selected websites to detect potential malware contained on sites using https connections. All scanning occurs locally on your PC during the HTTPS connection, and no one outside of your device can read or decipher the connection.
- Privacy Cleaner cleans all your browser history, all cookies including 3rd party, cached images, and other tracking scripts with just one click, to ensure that your online activity is private as well as free up space on your device.
- Privacy Guard is a built-in extension that helps make your online experience cleaner, faster, safer, and more private. It comprises Adblocker (stops ads from loading), Anti-tracker (blocks tracking scripts and cookies), and Anti-Fingerprint (disguises your browser fingerprint to help prevent websites from tracking you) features all in one. Privacy Guard collects and displays the number of blocked 3rd party calls from external sources.
- Sync means you can sign into the browser using your Avast ID or Google
 account. Your browsing data (including bookmarks, history, settings,
 open tabs, passwords, address, phone numbers, and payment
 information) will be then backed up and available across all your devices.
 If you sign into the browser using your Avast ID, we receive information

- that you sync across devices in encrypted form, and we are not able to access it or read it.
- Built-in VPN (virtual private network) that creates an encrypted connection between your device and the internet, securing your browsing data against eavesdroppers, trackers, and hackers. This VPN feature does not track or store connection timestamps, session information, bandwidth usage, traffic data, IP addresses, or other similar data. Using a VPN helps keep you more private and secure but you are still accountable for everything you do online.
- Avast Addons Store is an online store created and maintained by Avast that allows you to view and install a wide range of extensions. On installation of each extension, you will be asked what data you can share with the extension. Extensions are addons that are built to extend the functionality of the browser itself or integrate an existing service with the browser.
- Extension Guard is a built-in extension that helps protect against spammy, fake, or malware browser extensions.
- Webcam Guard helps protect against unauthorized access to your device camera.
- Video Downloader is an extension that allows you to convert and download videos from YouTube and other social media platforms.
- HackCheck see the HackCheck section.
- Accuweather widget used to display weather information on the new tab page based on the approximate location (derived from the IP address) and device model/OS.
- CouponFollow extension (only for US-based users) used to track and offer coupon codes and deals from online merchants to help you save money. The service is powered by our partner NextGen Shopping, LLC and in accordance with their <u>privacy policy</u>. In order to provide this service, the extension may analyze and collect certain information related to your browsing activities, specifically the webpages you visit and device information to determine which coupons to show you. The extension may also process coupon and shopping cart related data (e.g., if and how you used a coupon, cart amounts, discount value) and information regarding any technical issues encountered by the extension. For more information, please refer to NextGen Shopping's <u>privacy policy</u>.

By default, Secure Browser for Desktop processes locally on your system the following data:

- Browsing history information; for example Secure Browser for Desktop may store the URLs of pages that you visit, a cache of text, images and other resources from those pages. If the pre-rendering feature is turned on, a list of IP addresses linked to those pages may also be stored for some period of time;
- Name, surname, email or passwords to help you fill out forms or signs in to sites you visit;
- Permission that you have granted to websites;
- Cookies or data from websites that you visit;
- Data saved by add-ons;
- Record of what you downloaded from websites;
- IP addresses are not stored, only used for product localization and analytics purposes based on approximate location (city/country level);

This data is not sent to our environment. You can manage this data within Secure Browser for Desktop in the Settings page.

However, if you enable the Sync feature, we will process relevant browsing data in our environment to ensure the sync across your devices.

In our environment we process the following Service and Device Data (in addition to Account Data and Billing Data, if relevant) while using Secure Browser for Desktop:

Service Data	What we use it for and for how long
	•
Subset of URLs and referrers	Service Provision (36 months)
	 For the WebShield feature, a
	subset of URLs is processed in
	our backends for protection,
	detection, blocking,
	quarantining and deleting of
	malicious software or attacks.
Events and product usage	Service Provision (36 months)
	• To ensure functionality
	(installations, versions,
	updates, settings), map how
	users interact with the

	application and improve its design or flows In-product Messaging (24 months) • To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business
	Improvement
	 To better understand our users
	Product and Business
User's feedback ratings	 Improvement (36 months) To improve the product or its feature based on the user's feedback
	 Service Provision (36 months) To ensure functionality and prevent crashes based on the user' s feedback
User's feedback comments	Product and Business
	 Improvement (36 months) To improve the product or its feature based on the user's feedback
Sync data (bookmarks, history, settings, open tabs, passwords, address, phone numbers, and payment information (name on card, card number, expiration date))	 Service Provision (3 months) If you enable the Sync feature to ensure the sync of browser data across devices. If you disable the Sync feature, data is deleted within 3 months.

Secure Browser VPN events (such as
"upgrade now" clicks, "free trial" clicks
(called "application event identifier"))

Service Provision (36 months)

• If you enable the VPN feature to ensure the functionality (installations, versions, updates, settings), map how users interact with the application and improve its design or flows

Product and Business Improvement (36 months)

 If you enable the VPN feature, for product improvements, and development planning as we aim at developing best-in-class products

Device Data	What we use it for and for how long
	Service Provision (36 months)
	• For ensuring continuous
	functionality and breaking down
	entries in database
	In-product Messaging (24 months)
	To inform users of problems
	that will not be solved by the
Online identifiers (GUIDs, Account ID,	currently installed product and
Device IDs)	to offer users a solution to the
	detected problem
	Product and Business
	Improvement
	To better understand our users
	' behavior (60 months)
	To introduce a new feature or
	product based on previous
	experience (36 months)

	Service Provision (36 months) • To check for compatibility
	issues in automated crash dumps
	In-product Messaging (6 months)
	To inform users of problems
	that will not be solved by the
Information consuming a constant	currently installed product and
Information concerning computer or	to offer users a solution to the
device	detected problem
	Product and Business
	Improvement
	 To better understand users'
	behavior (60 months)
	To introduce a new feature or
	product based on previous
	experience (36 months)
	Service Provision (36 months)
	Setting up a proper product
	language version for Windows
	In-product Messaging (6 months)
	To inform users of problems
	that will not be solved by the
	currently installed product and
Location (on a city/country level)	to offer users a solution to the
	detected problem
	Product and Business
	ImprovementTo better understand users'
	behavior (50 months)
	To introduce a new feature or
	product based on country (36
	months)
Extensions installed in the browser	Service Provision (36 months)

	 To define rules of how the Browser should behave in relation to extensions installed (e.g. exceptions in scanning, filtering, notifications, whitelisting, blacklisting) In-product Messaging (6 months) To inform users about extension features and other available solutions Product and Business
	 To better understand users' behavior (60 months) To introduce a new feature or product based on user engagement and preferences (36 months)
Our other products/licenses on the device and their status (e.g. our antivirus product)	 Service Provision (36 months) To recognize what features should be enabled or disabled, what product should be installed or uninstalled Product and Business Improvement (60 months) To better understand users' behavior
	Service Provision (36 months)
Browsers (installed, default)	To provide import functionality, improve user onboarding and product experience Product and Business
	Improvement
	To better understand users' behavior (60 months)

To introduce a new feature or
product based on previous
experience (36 months)

The third-party analytics tools we use for Secure Browser for Desktop are:

- Google Analytics
- Mixpanel

For further information regarding our third-party analytics partners, including their privacy policies, please refer to our <u>Privacy Policy</u>.

Secure Browser for Desktop cooperates with these search engines:

- Google
- Yahoo
- Bing
- Seznam.cz
- Yandex.ru

For further information regarding these search engines please refer to their privacy policies under the links above.

Secure Browser for Desktop serves advertisements in cooperation with:

- Sovrn
- AdMarketplace
- Mocha
- Amazon
- Priceline
- AliExpress

For further information regarding these partners please refer to their privacy policies under the links above.

Secure Browser for Mobile

Official Product Name

<u>AVG Secure Browser for Android</u> and <u>AVG Secure Browser for iOS</u> (collectively as "Secure Browser for Mobile")

Core Functionality

Secure Browser for Mobile is a private mobile browser offered for Android and iOS users.

- Browser Security & Privacy Center is built in Security & Privacy Center which is a curated collection of some key security and privacy features, tools and settings, organized into one management console making it easier for you to control and manage your online privacy and security.
- Adblock stops ads being shown in your browser using publicly available blocking lists. AdBlock usually does not remove ads, it already prevents them from being loaded and thus also speeds up browser experience.
- Anti-Tracking prevents the user from being tracked across websites by avoiding tracking cookies to be created. This is done using publicly available blocking lists. Anti-Tracking usually does not remove the tracking cookies, instead it prevents them from being loaded and created and thus also speeds up browser experience.
- Anti-Fingerprinting prevents the user from being tracked across websites using browser fingerprinting techniques. As fingerprinting itself cannot be prevented or avoided, this feature prevents being tracked by altering the digital fingerprint of the users browser in a way that third-party sites cannot re-identify it.
- **Web Shield** protects you from accessing dangerous websites, such as fake sites, sites that have harmful content such as adware, spyware, ransomware, viruses, all types of other malware that aim at stealing your information.
- **Built-in VPN** (virtual private network) creates an encrypted tunnel between your device and the internet, securing your browsing data against eavesdroppers.
- Security Scanner feature will scan the device, its internet connection and browser configuration (otherwise known as Browser Shields) for threats and vulnerabilities, process the findings, and display a result screen with potential improvements.
- Nuke cleans your browser history, cached images, cookies including both first-party and third-party cookies, and other junk with just one click for a specified domain, to keep your activity on that domain private and free up disk space.

- Remove Site Data cleans your browser history, site cookies, and offline data with the current site with just one click, to keep your activity private and free up disk space.
- Video Downloader enables you to download videos from supported websites to your device.
- Media Vault allocates your files, including those you download during your browsing sessions, to the browser application's encrypted file system. These files are stored on your device and are accessible through the browser application.
- **Secure Mode** encrypts your DNS queries, stops ads being shown in your browser, prevents your browsing history from being stored, and removes any tracking cookies (both first-party cookies and third-party cookies) or web cache you pick up during that browsing session.
- Secure & Private Mode creates an encrypted tunnel between your device and the internet, encrypts your DNS queries, stops ads being shown in your browser, prevents your browsing history from being stored, and removes any tracking cookies (both first-party cookies and third-party cookies) or web cache you pick up during that browsing session.
- **PIN Protection** secures your device against real world threats from local attacks by locking access to the browser application on your device with a unique code only you know. Your PIN Code is encrypted on disk and is not stored on any servers.
- **Privacy Statistics** are showing the users' the advantage of our AdBlock and VPN through numbers, by presenting the number of ads blocked, number of malware blocked by our Web Shield, amount of browsing data protected by our VPN.

By default, Secure Browser for Mobile processes locally on your system the following data:

- Browsing history information; for example Secure Browser for Mobile may store the URLs of pages that you visit, a cache of text, bookmarks, zones, images and other resources from those pages.
- Permission that you have granted to websites;
- Cookies or similar technologies such as pixel tags and web beacons from websites that you visit;
- Records of what you downloaded from websites when using Media Vault.

This data is not sent to our environment. You can manage this data within Secure Browser for Mobile under the "Browsing Mode Settings" and "Data Settings" section of the Security & Privacy Settings page.

In our environment we process the following Service and Device Data while using Secure Browser for Mobile (in addition to Account Data and Billing Data, if relevant):

Service Data	What we use it for and for how long
IP address	Service Provision (per session) Replaced with country for delivering geo-specific changes to configuration (both local or remote) For prerendering feature functionality, if activated
Events and product usage	 Service Provision (36 months) ◆ To ensure functionality (installations, versions, updates, settings), map how users interact with the application and improve its design or flows In-product Messaging (24 months) ◆ To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement ◆ To better understand our users' behavior (up to 24 months) ◆ Findings about product have an effect on the design or layout of the new one (24 months)

Device Data	What we use it for and for how long
-------------	-------------------------------------

Online identifiers (GUIDs, Device	Service Provision (24 months)
IDs)	 To ensure functionality (installations, versions, updates, settings) and to track users subscription trials and purchases In-product Messaging (24 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement To better understand our users' behavior (24 months) To introduce a new feature or product based on previous experience (24 months)
Information concerning computer or device	Service Provision (36 months)

These are the third-party analytics tools we use for Secure Browser for Mobile:

- Google Firebase Analytics and Crashlytics for Android
- Appsflyer

For further information regarding our third-party analytics partners, including their privacy policies, please refer to our <u>Privacy Policy</u>.

Secure Browser for Mobile cooperates with these search engines:

Google

Secure Browser for Mobile serves advertisements in cooperation with:

- Sovrn
- AdMarketplace
- Mocha
- Amazon
- Priceline
- AliExpress

Secure Identity

Official Product Name

AVG Secure Identity

Core Functionality

Secure Identity helps keep yourself safe with the advanced identity protection - including credit monitoring, alerts to help you determine if your identity has been compromised and specialist support.

Personal Data We Process

The product is provided in cooperation with Sontiq, Inc. We share your name, surname, license ID and email with Sontiq so that they can prepare the service

for you. The data processing within the product is governed by this <u>Privacy</u> Notice.

Secure VPN

AVG Secure VPN

We are a leading provider of security and privacy tools and therefore we are deeply committed to protecting and respecting your privacy. Our <u>VPN Policy</u> (together with any other documents referred to in it) sets out the basis on which any data we collect from you, or that you provide to us, will be processed by us.

TuneUp

Official Product Name

AVG TuneUp for Windows, AVG TuneUp for Mac (collectively as "TuneUp")

Core Functionality

TuneUp is an ultimate tune-up program which speeds up and cleans your PC (Windows and Mac), updates installed apps, and fixes other problems.

What are Product's Features

TuneUp for Windows:

- Maintenance scans and deletes registry items, shortcuts, system and programs temp or unnecessary files, browser caches, history and cookies.
- **Program Deactivators** scans and disables installed third-party programs which have background, startup or scheduled tasks.
- Software, Disk or Browser Cleaner scan and temporarily hide or uninstall third-party programs, deletes unnecessary files from disk or browser history.

- **Fix Problems** scans and fixes common Windows problems which might put PC at risk (e.g. missing Windows updates, administrative shares on public folders).
- **Disk Doctor** or **Defrag** scans for potential errors and fixes system drive or defrags your system drive.
- **Software Updater** scans and updates third-party programs and their versions installed on PC.

TuneUp for Mac:

- Clutter Scan scans and deletes application caches, log files, trash, downloads folder, development junk. It looks for similar data on connected external drives as well. Only data on the amount of KB and cleaned is processed.
- Find Duplicates scans for duplicate files in directories selected by you.
 Only data on the amount of KB and duplicate files found and cleaned is processed.
- **Find Photos** scans photos and evaluates their quality and similarity to help you decide which you want to keep. Only data on the amount of KB and photos found and cleaned is processed.
- **Uninstall Apps** scans and removes applications and programs for which it is necessary to process app name, size, version and last date of its usage.

Personal Data We Process

While using TuneUp, we collect and process the following Service and Device Data (in addition to Billing Data or Account Data if relevant):

Service Data	What we use it for and for how long
Events and product usage (such as product version, product language, license type, days to expiration, number of potential problems or detected junk)	 Service Provision (up to 12 months) ◆ To monitor service functionality In-product Messaging (12 months) ◆ To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement

•	To better unde	erstand o	our us	ers' be	havior
	(12 months)				
	- .		- 11		

•	To improve users' overall experience by
	developing new features or products (up
	to 12 months)

Device Data	What we use it for and for how long
Internal online identifiers (GUID, MIDEX, UUID, Device ID)	Service Provision (up to 12 months) ■ To identify correct installation In-product Messaging (12 months) ■ To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem
Information concerning device (platform, types of cleaning objects, objects size, app name, vendor, version, rating, certification)	 Service Provision (up to 12 months) ◆ To check for compatibility issues in automated crash dumps In-product Messaging (12 months) ◆ To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (up to 12 months) ◆ To better understand users' behavior ◆ To introduce a new feature or product based on previous experience
Location (country, region, city, latitude, longitude, internet service provider, internet autonomous system)	version for Windows

	product and to offer users a solution to the detected problem Product and Business Improvement (12 months) To better understand users' behavior based on approximate location To introduce a new feature or product based on approximate location
Applications (our other products, installed applications on a user's computer)	 Service Provision (up to 36 months) Our other apps to know which products users already have on their computer Third-party applications or programs installed on users' computers to improve Cleanup Sleep Mode, Software Cleanup and Software Updater functionality In-product Messaging (6 months) To inform users of problems that will not be solved by the currently installed product and to offer users a solution to the detected problem Product and Business Improvement (up to 36 months) To improve the users' overall experience by developing new features and products To understand/estimate market opportunity for new products and new features

The third-party analytics tool we use for TuneUp is <u>Google Analytics</u>. For further information regarding our third-party analytics partner, including its privacy policy, please refer to our <u>Privacy Policy</u>.
